Highlight Playground

An original practice document for your research vault.

Select each sentence below and choose the matching meaning.

1. Claim / contribution

Semantic highlights make a reading history searchable.

2. Method / setup

Save a PDF, select a sentence, and assign a meaningful color.

3. Result / evidence

The generated Markdown note contains the selected passage.

4. Assumption / limitation / question

A set of highlighted excerpts is not a complete paper analysis.

5. Connection to my research

Link one passage to a question in your current project.

Try it: search for "searchable" after highlighting the first sentence.

Then ask Codex to write a short note with links to the evidence.

This is a workflow exercise, not a scientific paper or empirical result.
